

BIG BANG: THE MUSICAL

Song by Danny Tieger

LYRICS:

I'm flippin' channels on my tv set.
Haven't found somethin' worth watchin' yet
Suddenly the fuzz is settin' in
It's good old-fashioned entertainment

CHORUS

(Big Bang)
It's been proven to be true
That some percent of static that's bugging you
(Big Bang)
Is radiation (that we can't see)
From the big bang
Big bang
Big Bang on your TV.

Digital television doesn't count
They've found a way to keep the signal out
But if your TV set's about to go,
You're watching 14 billion years ago!

Planck found a way to see that light,
Subtracting dust from the pictures of the sky at night.
A microwave patchwork of what it was.
And I can see it in my TV fuzz!

CHORUS

And by scanning the sky and dissecting what they found
Cosmologists believe they know the shape of space around
The static mathematics have been translated to this sound...

With hundreds of channels on cable and broadband,
I'd rather sit at home and watch the universe expand.
If inflation had a station it would be my destination,
Put the flicker of existence on the clicker in my hand

CHORUS

From the big bang
Big bang
Big bang on your TV!
